## Export – Middle East

Dear Customer,

due to the recent and escalating developments in the Middle East region, particularly in the vicinity of the Strait of Hormuz, carriers have announced significant operational and financial measures in response to the situation.

These measures include, on our part, the potential implementation of an additional surcharge as well as additional costs that will be passed on to the goods. We reserve the right to temporarily close bookings and/or cargo deliveries at our CFS.

We are monitoring the situation with utmost attention and will issue further updates as soon as additional verified information becomes available.

If you have any further questions, please contact your local SACO Shipping Team.
