Export / Import Impact Middle East conflict

Dear valued customers,

The ongoing conflict in the Middle East is currently affecting global supply chains. As a result, we anticipate potential delays and increased costs in both import and export operations, as well as possible blank sailings. At this time, it is difficult to predict how long these disruptions will continue.

SACO Shipping GmbH is making every effort to maintain our services as reliably as possible despite the current circumstances.

Please also note that an Emergency Bunker Surcharge (EBS) will be introduced effective 16 March 2026. The updated surcharge will be available in our latest surcharge list.

We appreciate your understanding and will continue to keep you informed of any further developments.
